

To Open Big The Rolling Hills Tract District

To Irrigate 25,000 Acres of Land South of Brooks

From 80 to 100 farm families from the south-west area of the southern prairies will be placed on irrigated lands in the Rolling Hills area, some 20 miles south of Brooks and 7 miles east of Lethbridge during the next few years. Fifty thousand acres of land in that district can be irrigated but the present plan, as announced last week by Hon. J. G. Gardiner, federal minister of agriculture, provides for settling 25,000 acres. Brooks Bulletin

A Joint Convention Held at Whitlaw

Liberals, Conservatives and U. F. A. Had Joint Meeting

A political meeting was held at Whitlaw last Saturday for the provincial constituency of Cypress. It was a joint convention of Liberals, Conservatives and U. F. A. who joined together for the purpose of uniting, and decided to all support what ever candidate was selected to oppose the present government.

A committee was appointed for the purpose of making arrangements to call a later convention to select a candidate who will be supported by the joint political parties.

TO SPEND \$100,000 ON PLANT AT HAT

Alberta Clay Products Company Limited, the sewer pipe and brick industry, established in Medicine Hat in 1910, announced immediate construction at a cost of \$100,000 of a branch for the manufacture of stoneware, pottery, glazed tile and brick and kindred products, employing fifty persons.

Mr. W. King, principal of the School, has been unable to attend school for the past few days as he is undergoing serious treatment with his dentist.

Concert in Cliff Hall Next Sunday Evening

Is Held To Raise Funds For The Needy in Town

Mr. Bert Allison is making arrangements to hold a series of concerts on Sunday evenings after church services, in order to raise funds for the purpose of distributing it between those who are unemployed. The first one will be staged on Sunday evening, Nov. 5th. It is hoped there will be a good attendance at all the concerts. W. Swanson has been chosen as secretary.

We are informed that a splendid program is arranged for Sunday evening and that talent from the town and surrounding district will take part.

A series of programs is being arranged for the following Sunday evenings and it is hoped that the concerts will be well patronized as those who are organizing the movement, as well as those who are taking part, are deserving of support. A collection will be taken up and the funds will be used for distribution among the unemployed and the needy.

Local Greenhouse Is Now Under New Management

Is Now Well Under Way For Vegetables and Flowers

The Redcliff Greenhouse has been purchased recently by Messrs. Wahl and Fraser who are now in charge and both are residing in town.

Under the new management the plant is now well down with all kinds of vegetables and flowers and within two weeks there will be a fine crop of ripe tomatoes for sale. There will be a good crop of lettuce for sale and within two weeks there will be a good supply of flowers such as mums, snapdragons, sweet peas, stocks and freesias.

In the spring there will be a good supply of all kinds of flowers for bedding out.

Members of the new company are experienced gardeners and will have a fine crop for all seasons of the year.

Dr. Charles W. Gordon, who is known as an author as Ralph Connor, died in the hospital in Winnipeg last Sunday.

Mrs. Percilla Tonks who was a former resident of Redcliff and who was a popular football player on the Hat girls team, was married last Tuesday to Mr. Tom Walker of Medicine Hat.

Redcliff School News

The Literary meeting, Friday October 29th took the form of a Halloween party. The majority of the members came in costume. Norma Osgood, dressed as a baby on the grand prize.

Various games, such as ducking for apples, biting apples and solitaires costed buns from a string were played. In the bean-throwing contest Vivian Marty proved to be the straightest shooter. A peanut pushing race was then run or rather nudged. Vivian Marty, Alfred Goodline, and Billy Blades won by a nose.

Everyone thoroughly enjoyed themselves, the only regret being that Mr. King was unable to attend the Halloween party.

School Literary News

The annual parade of the spooks was held at the Redcliff School, Friday, October 29th. The following were the prize winners: Ethel King won the first prize for the comedy dress. Vivian Marty and Bessie Gordon were second. For the most original costume Colleen Jackson came first with Kathleen Cochrane second. Jacqueline (Toots) McClary was an easy winner for the fanciest costume. Patricia Woods won second prize.

Blatherskites Are Circulating Reports

Which are Not Correct About Distributing Vegetables

During the past week vegetables which have been shipped from farmers north of the province have now been well distributed to farmers of this district and townpeople who have been in need.

Some blatherskites in town have been circulating reports that Mayor Sangster and W. Pickering who have been assisting in distributing these goods, have been helping themselves to a fair share of vegetables. This we are assured, is a downright lie, as neither of them has had any of the goods.

We are informed that about 10 families in town have received some of the vegetables.

It is expected that some fruit from B. C. will arrive in the near future.

Now is the Time We have Just Unloaded A Car of The Best B. C. Apples That Money Can Buy

Different Brands and Grades. We can sell these much cheaper now before the weather changes. One of our Medicine Hat men, who knows the Apple Game, shall be in our Redcliff store all day on Saturday to assist Mr. Gann, to select, to sell, or take orders for future delivery. The beautiful display of windows at our store are well worth seeing. Don't miss it even if you don't buy. Among others are such well known as Macintosh Fancy and Household, Gravenstein Highly Colored, Northern Spy, Wagner Cox Orange, Delicious, Winter Banana, Jonathan and Anjou Pears.

Prices Ranging from \$1.45 to \$2.19

Satsuma Oranges, similar to Japs, per doz. - 25c

Local Citizens' Golden Wedding Was Celebrated

Mr and Mrs P. Lavelle Married 50 Years Ago

Just 50 years ago, on October 31st an esteemed couple of Redcliff citizens were married in Renfrew country Ont. Almost a quarter of a century ago they came to Redcliff and have resided here ever since. So popular and revered are they today that their many friends assembled at Cliff Hall last Saturday evening to celebrate the golden wedding of the honored guests: Mr and Mrs Patrick Lavelle.

They entered the hall to the tune of "A Wedding March" and were followed by their daughter, Mrs. Nicholson, of Calgary, their grand son Mr. Jas. Moran of Lethbridge and his wife, their grand daughter Mrs. Elder, of Calgary, Mrs. Brooks of Taber and Monsignor McCoy of St. Patrick's Church Medicine Hat.

After all were seated a dainty supper was served to a large crowd of town pioneers and friends of the honored guests. Mr. C. T. Hall, a pioneer of the town, acted as chairman of the evening and spoke feelingly of esteem in which the honored guests of the evening were held among citizens of the town and district.

Father McCoy was called upon to propose the toast to the bride and groom. He congratulated them on having reached the 50th anniversary of their marriage and having kept their vows to the church so faithfully through the years. He wished them a long, healthy and happy life and asked God's blessing on them.

In his attempt to reply, Mr. Lavelle was deeply affected but his remarks were most feeling and appropriate, and his thanks for the gathering were from the bottom of his heart.

Messrs. C. Buchholz, A. J. Learmonth and J. Strout who had been associated with Mr. Lavelle in the same country for a number of years spoke of the kindly feeling which had always existed and expressed the hope that it would continue indefinitely.

Messrs. G. H. Worts and Mayor Sangster referred to the service which Mr. Lavelle had rendered

Local Rebekah Lodge Held Social Evening

Was Well Attended And A Pleasant Evening Spent

A pleasant social evening was held in their hall last Friday evening under the auspices of the Rebekah Lodge.

During the first part of the evening whist and bridge were played, after which refreshments were served and a short program followed.

In his whist drive prizes were won by Mrs. Phillips and Mr. Gann and consolation by Mrs. Schneider and Mr. Colbeck. In bridge Mrs. R. Davies and Mr. J. Zolan were winners and Miss M. Skidmore and Mr. Ambury won the consolation.

The evening was thoroughly enjoyed by all present.

to the town while on the School Board and Town Council and attended sincere wishes for the continuance of Mr and Mrs Lavelle in our town.

Mr. McCrory an officer of Knights of Columbus of Medicine Hat, presented Mr. Lavelle, who is a member of the lodge, with an illuminated address conveying the best wishes of the lodge to himself and his wife.

Ed L. Stone proposed the toast to the ladies. Mrs. Bamforth replied in a very fitting manner.

The ladies who arranged the evening program, presented Mrs. Lavelle with a fine purse and Mr. Lavelle a purse of gold to commemorate their golden wedding anniversary.

During the evening Miss McWain, Miss Kene and Mr. A. Shaw rendered very appropriate songs for the occasion, and community singing was led by W. Campbell.

Little Shirley Lakey, who was present with her parents, from Medicine Hat, gave a delightful display of acrobatic feats which the crowd thoroughly enjoyed.

The evening's program was closed with a dance which lasted till midnight. All present had a great regard for Mr. and Mrs. Lavelle and were delighted to be at their golden wedding.

The hostesses of the evening were Mrs. Basile, Mrs. Worts, Mrs. Stone, Mrs. Hargrave and Mrs. Hall.

Mr and Mrs Lavelle wish us to extend their sincere thanks and appreciation to those who were instrumental in arranging the restoring for their golden wedding and all who contributed to the presents which were presented to them.

Banks And The Newspapers Left Supreme Court

Inoperative Until Judgement In Case is Given

After serious consideration the cabinet of the Federal Government has decided that Alberta bank taxation, credit control and newspaper regulation bills will be subject to reference to the Supreme Court and probably the Privy Council, to determine if they will become law. Premier King had announced last Tuesday afternoon.

The Supreme Court will be asked to receive such evidence and admit such proof as it may consider necessary in order to determine whether the bills, if allowed to become law, would be within the competence of the Alberta Legislature. In the meantime the reservation of assent will prevent the act from becoming law.

Discussion on union action by the policies opposed to the Alberta Social Credit government will be continued in Calgary next week. It was stated.

A car load of apples from B. C. arrived here today for distribution around the district for farmers who had no crop as a result of the drought.

A total of 907 prizes, awarded to Alberta butter at the 9 largest exhibitions in Canada represents 50.2% of the total awards. No other province approached the Alberta record.

During the past few weeks considerable robberies have been made in stores and offices in Alberta. There has not been any in Redcliff for some time but that is no reason why necessary precautions should not be taken.

The October 25th issue of LIFE magazine contains a series of photographs taken on Lord Tweedsmuir's recent tour of the Canadian Northwest which will be of an especial interest to all Canadians.

British Scientists Point To The Dangers Arising From Unnecessary Noise

H. V. Thomas, writing in the Sunday Pictorial, voluminously details the waste of efficiency, time and happiness caused by unnecessary noise.

Pointing out that the recent discussion of noise at the British Association is no new departure, the writer states that for the last six years half a dozen Boards of noise or its importance and agrees of bringing-broved scientists have been investigating the problem.

The Institute for the Deaf say that more than 3,000,000 people in the country suffer from defective hearing, and that, undoubtedly, noise has played a part in bringing this colossal figure up to its present strength. By noise is meant unnecessary or undesirable sound.

The National Physical Laboratory, which has been investigating the noise evil for several years, asserts that noise encourages nervous complaints and indubitably wastes energy.

Lord Horder, spokesman of the medical profession, says that noise enters the human nervous system so that both the natural resistance to disease and the natural power of recovery are lowered.

Professor Henry King, spokesman of the deaf, says that noise is even more strongly by saying that the cost of noise in this country is probably 500,000,000 a year in human welfare.

Tests have proved that, in a noisy room, typists lost three per cent. speed and expel 13 per cent. extra energy; also that when noise was eliminated in a telephone exchange, the mistakes of the staff were reduced immediately by 10 per cent.

More tests have shown that the output in the quiet part of the factory was appreciably more than in the noisier quarters.

One can distrust isolated conclusions of this kind, but one is forced to respect evidence when it is repeated again and again.

Noise is probably the largest single break on the wheels of industry to-day. And yet the writer does not think that this is its worst crime. Human efficiency may be important, but human happiness is more important.

In industry and business, because money is at stake, something is gradually being done to abate the noise nuisance. But in private life, because there are no boards to guide it, noise will go on as before, and each man thinks that it's none of the other fellow who is to blame.

And with more noise and more small houses, the output of hate will increase, while the output of neighborliness diminishes.

Unless, that is, the man in the street—and that means everybody—will co-operate with the scientists by seeking to reduce noise in private life.

One can see it in that one's radio is not loud enough to disturb the next-door neighbor. One can be careful to close the car-door at night by the handle, one can silence the vacuum cleaner, one can talk quietly in restaurants, one can remember all the time that any kind of interference with another's pleasure is boorishness and that noise is the most frequent interference of all.

Notes, you say, never bother you? It only worries nervous, over-sought people? Well, what makes them nervous and over-sought?

Notes, as often as not, will get you yet, if you don't help to do something about it.

Million in Paper Money

Summary Shows Large Sum in Hands of Canadian Public

Hidden in ledgers or under mattresses, carried about in pockets, purses or deposited in merchant's tills more than \$200,000,000 in paper money is in the hands of the Canadian public, according to the September statistical summary of the Bank of Canada. The August average of note circulation, which is the sum of notes in banks, was \$203,000,000, higher than any time since the boom year of 1929, when it averaged \$203,000,000. In 1935 the total active note issued averaged \$169,000,000.

Planes For Transfers
The post office has started telephone service between the trans-Canada and home parts. Its normal range at sea is about 100 miles, but it may be extended under favorable conditions.

A milk bar, opened at an East Winnipeg (Canadian) public house, is doing business. Miners drink 50 gallons daily.

Seed Growers' Assistance

Need Seed Purchasing Organization For This Purpose

For those permanent organizations such as a seed purchasing commission to assist Canadian farmers through purchase of seed each year was organized before the Toronto Royal Grain Commission at Winnipeg by F. L. Dickinson, vice-president of the Canadian Seed Growers' Association.

Presenting the brief of his association, Mr. Dickinson said many seed growers have difficulty, especially in recent years, in financing their operations, more particularly during the period after threshing and until the seed is sold in the spring.

He requested the commission to consider the problem of the ability of seed growers to hold the high quality seed they have produced in their farms until it is required several months later for spring sowing.

"Each year thousands of bushels of this valuable seed is marketed through commercial channels and shipped out as grain because the seed growers cannot finance the holding of it until it is required later on," he said.

Some exchanges operated by some of the provinces have helped greatly but it is still a difficult matter for the farmer to obtain a loan of seed to secure the necessary financial assistance.

"There is a need for some permanent organization such as a seed purchasing commission to take care of these purchases of seed each year. If this could be accomplished it would not only assist the seed growers but it would also help the farmer to obtain a loan of seed to secure the necessary financial assistance. Pure seed is a necessary provision for the farmer to obtain in his present state in world grain markets, Mr. Dickinson said.

Guarded Windsor Castle

Chief Of Fire Brigade Retiring After 20 Years

The man whose job it has been to protect one of the most valuable and historic buildings in the world for 20 years has just retired, reports the Overseas Daily Mail. He is Chief Officer Chadwick, of the Windsor Castle Fire Brigade. During all that time there has been no outbreak of fire in the castle. But there have been some "narrow squeaks." Owing to the immense value of the treasures in the State, the castle is guarded by a large force of troops and a large number of works of art is insured. "It is impossible to say how many millions pounds premium would be required," he said. Other day.

"The contents of the Royal library alone are worth several millions." The nearest approach to a serious outbreak was five years ago, when some Elizabethan timbers in the roof of the castle were caught alight. If the brigade had not been on the spot with the latest appliances within a few minutes, the whole of the old cloisters might have gone.

The King's Gardeners

Like Other Landowners He Recruits Them From Scotland

Like many landowners in England, the King recruits his gardeners from Scotland, says the Glasgow Bulletin, which reports that His Majesty has appointed a Scotsman, Alexander MacKinnon, as manager of his farms at Sandringham, which will include the experimental farm King George V. started some years ago in the name of the King's father-in-law, Lord Strathmore, at St. Paul's, Walsby, the estate on which the King was born and spent so much of her childhood.

New Glass Discovered
Is Transparent To Light But Will Shut Out Heat

Production of a glass that shuts out heat is promised in Prague, Czechoslovakia, as the result of a discovery of a Bohemian inventor. The glass is opaque, or nearly opaque, to heat. While it is transparent to light it can be used to exclude heat. Light waves and heat waves do not differ in kind but in wavelength, and it is the mid-infrared waves that it is found out how to prevent heat waves from passing through the glass.

When in light, hawes steer with their tails.

2225

TANKS INVADE DESERTED VILLAGE

The distant booming of shells and the occasional roar of a bombing plane diverted matched the low rumble of these tanks as the Japanese juggernaut rolled through a deserted village and war-torn countryside in North China as Tokyo's legions pushed a major offensive in the Tientsin area, near the Tientsin-Pukow Railroad.

Trees In New Gardens

Many Of Historic Estates Are To Be Seen There

New Gardens, in London, have been having a little controversy. It is said 100 years ago since the structure known as King William's Temple was built on the rising ground on the opposite side of Pagoda Vista from the Linne, William IV, like his predecessor, George IV, did not take much interest in the gardens and this "temple" is almost the only thing left to mark his reign.

Close to the "temple" are the witch-hazel which will soon be displaying their curious gully-pollux flowers and here also may be seen two rare specimens of the so-called Tree of Heaven.

Neatly seen the honey suckles and mulberries. One of the mulberries is directly descended from the tree that grew in Shakespeare's garden at Stratford-on-Avon. Another tree of interest in the gardens is Queen Elizabeth's elm. All that remains of it is to be seen at Brentford Ferry Gate. In her girlhood, when living at Richmond Palace, Queen Elizabeth used to walk by the river and sit beneath this once stately elm. Then there is a weeping willow on the bank of the Pond that was grown from a cutting taken from the tree that overhung Napoleon's grave at St. Helena.

One Honest Dollar
The pompous judge glared sternly over his spectacles at the convicted prisoner, who had been dragged before the bar of justice on a charge of vagrancy.

"Have you ever earned a dollar in your life?" he asked in scorn.

"Yes, Your Honor," was the response. "I voted for you at the last election."

The sugar maple is one of America's greatest all-purpose trees.

Butler Was Suspicious

Thought Henry Ford's Tools Might Be Burglar's Kit

Henry Ford, the famous automobile maker, was suspicious of the tools he used in his workshop. He thought they might be a burglar's kit.

He was so suspicious that he had his tools examined by a police officer. The officer found that the tools were indeed a burglar's kit.

Airplane Is Now Opening Up A New Mining Frontier In Northwest Territories

Chemically Treated Seeds

Originator Claims Method Will Change Agricultural Practices

A revolutionary change in agricultural practices through use of chemically-treated seeds was forecast by Howard D. Salina, Chicago, after harvesting of test plots of flax and corn in Illinois and Wisconsin.

Salina, inventor of the process, said it is applicable to all forms of plant life.

Results of this year's tests proved to his satisfaction, Salina said, that flax of quality equal to that of the best grown in Europe can be grown in North America from treated seed and that it afforded a highly profitable return to farmers. Little flax is now domestic flax and is grown now, although there is considerable seed flax.

Yields of corn from treated seed, he said, were 25 per cent. greater than yields from various kinds of untreated seed planted in adjacent fields. In the case of flax, the results were even more pronounced. Flax, where flax is grown, is not less than 80 days and corn is cut for silage, a number of farmers, Salina said, grew corn to maturity from treated seed.

Yields of corn from treated seed, he said, were 25 per cent. greater than yields from various kinds of untreated seed planted in adjacent fields. Just as the covered wagon and pack train of pioneer days carried the tide of civilization westward on the North American continent, so the airplane of to-day is opening up a new mining frontier in the Northwest Territories. Long regarded only as a region of low and even, this vast expanse of land embraces more than one-third of all Canada, is now destined to play an important role in the economic life of the Dominion due to the introduction of aerial transportation. Many areas once almost inaccessible are now within a few hours flying time from large centers of population, and regions rich in minerals of economic importance—radium, copper, nickel, gold, lead, zinc and silver—await the prospector.

The year 1929 was the turning point in the affairs of the Northwest Territories, when mineral-exploration companies concentrated their efforts on the airplane could be used to advantage in these northern latitudes. The range of the prospector's activities had been limited to the immediate vicinity of the lands in close proximity to rivers and lakes, and little was known of the country back for miles, a number of years ago.

With the advent of aerial transportation the movement of the prospector and his equipment has been greatly facilitated. The necessity arose for maps far more detailed than those then available. By resorting to the airplane and the modern means of mapping, including aerial photography, topographical and geological maps were prepared. In 1930, for example, a map of 11,000 square miles to the east of Great Bear Lake was completed. In 1931, a map of 17,500 square miles to the east of Great Bear Lake was completed. In 1932, a map of 17,500 square miles to the east of Great Bear Lake was completed.

Previous to 1929 the principal mineral developments in the Northwest Territories were the location and development of lead, zinc and copper deposits near Pine Point, Great Slave Lake, and the discovery of oil at a point about fifty miles below Norman on the Mackenzie River, where there are now two producing wells. As a result of aerial exploration, a number of new copper-sulphate deposits were discovered in the area between Great Bear Lake and the Ogish River, and this was followed by the notable discovery of pitchblende-ore deposits, on the Ogish River, at Lake Point, on the eastern side of Great Bear Lake, in May, 1930. In 1931, a map of 11,000 square miles to the east of Great Bear Lake was completed. In 1932, a map of 17,500 square miles to the east of Great Bear Lake was completed.

According to recent reports Canada's northern mineral front continues to be the scene of great activity, and aerial transportation companies are busily engaged in carrying freight, supplies, and men to remote areas. In most of the mining country of the North there are numerous lakes which provide suitable landing for aircraft with floats in summer and with skis in winter.

For British Zoo
Shipment Of Wild Animals Sent From Canada To England

From the parks area of Western Canada a shipment of wild animals, consisting of two female buffaloes, a pair of bears and a pair of beaver is on route to England. Donated to the Zoological Society of Dudley, Worcestershire, England, by the National Parks Bureau, Land, and Forests, Department of Mines and Resources, the buffaloes were taken from Elk Island National Park, near Edmonton, Alberta, to Montreal accompanied by a park warden and sufficient food for their journey. From Montreal they sailed on the Canadian Pacific steamer, under arrangements that they would be fed and tended by a member of the ship's crew during the ocean voyage.

The crates were stored on the dock of the steamer and attached to each was a tag giving full instructions for the feeding and care of the animal. Each of the buffalo require sixteen pounds of hay per day, while the bears have a more varied menu consisting of two loaves of bread, a pound of apples, and a pound of carrots daily for each of them. Five peapods of water, two inches in diameter by about two feet long and a quarter of a cabbage is the daily fare of each beaver. Before sailing from Montreal a supply of provisions including faggots of fresh pork were put on board the vessel.

The conservation and protection of native fauna is one of the primary functions of the National Parks of Canada and under the watchful eye of the park warden service will live, in all its forms is being preserved for the benefit of this and future generations.

Britain Like Canadian Eggs
Reports Not Large But Productive

Sells At A Premium
Canadian eggs are becoming increasingly important in the British market. Agriculture Department officials predict that the total production of British this fall would be 1,250,000 dozen. A 21 per cent. increase from 1934. The export season is from mid-September to the end of November. Up to this time 2,270,000 dozen had been shipped.

Although exports to Great Britain are not large in comparison with those to other countries, Canadian eggs sell at a premium there. Saskatchewan, Manitoba and Ontario are the chief exporting provinces.

Not Conductive To Sleep
Perhaps the world's most unique bedstead is that in a two-toe in Kenya, East Africa. For a \$50 charge, one may lie and watch all sorts of wild and curious animals, leopards, elephants, rhinoceroses, and hyenas.

These Kittens Are Fun To Stitch

These kittens will come without much coaxing—they're entirely in single and outline stitch and you know what little work that is—use them on a piece of paper. You can see that the pattern is a kitten. They are 8 1/2 inches long and 4 1/2 inches wide. Color chart and key are given in the pattern. In pattern 5119 you will find a transfer pattern of a kitten 7 1/2 inches long and 4 1/2 inches wide. Illustrations of all stitches used, material requirements and suggestions.

To obtain this pattern send 20 cents in stamps or coin (preferred) to Household Arts Dept., Winnipeg Newspaper Co., 319 McLeod Ave., Winnipeg.

There is no Alice Brooks pattern book published.

TOWN OF REDCLIFF The Local Tax Arrears Consolidation Act

The Council of the Town of Redcliff has passed a By-law declaring that the above Act will be applicable to the Town of Redcliff and said By-law has been approved by the Minister of Municipal Affairs in writing. All consolidated arrears of taxes shall under this Act be payable by five equal annual installments together with the current taxes on or before the 15th day of December except as hereinafter mentioned.

The following persons may make application to the Council to come under the provisions of the above Act.

Any person, firm or corporation who is the owner of any parcel of land in the Town of Redcliff, against the title of which, there is subsisting no objection for arrears under "The Tax Recovery Act 1929".

Any person who has been a bona fide resident of the Town of Redcliff for 12 months immediately preceding the date of application, in the case of persons which have been finally assessed by the Town of Redcliff, and of such persons personal representative.

In such cases where the applicant's property is to be exposed for sale at the forthcoming Tax Sale on Sept. 15th, 1937, such applicants should make their applications in time for the Council to consider same previous to that date.

Upon receipt of the application, the Secretary Treasurer shall calculate the amount required to pay the arrears of taxes, if the same were consolidated, and the applicant shall deposit with the Secretary Treasurer one fifth of such sum.

In such cases where the applicant to consolidate is made after the 5th day of November 1937 the applicant shall also deposit with the Secretary Treasurer sufficient to pay the current year's taxes.

In any event the current year's taxes shall be paid by the applicant on or before the 15th day of December.

When the application is granted, the deposit shall be applied on the applicant's consolidated arrears, otherwise it shall be repaid to him.

In case the application is not granted, provision is made in said Act for an appeal to the Minister of Municipal Affairs. No buildings, fences, fixtures or other improvements shall be removed from any land in respect to which there is a subsisting tax consolidation agreement.

To those who properly come under the provisions of the above Act, all proceedings under the Tax Recovery Act 1929 are suspended in respect to the properties involved while such consolidation agreement is in effect.

The Dominion Government has planned to purchase large quantities of fruit and vegetables for shipping to the drought areas of Saskatchewan and Alberta. The purchase is being made through the department of agriculture.

You NEED A MODERN WASHER

Save yourself hours of hard "scrub board" washing — with a modern Westinghouse Cushioned-Action Washer. Designed to wash clothes quicker, better and with less wear. Million-Dollar Mechanism never needs oiling. A real investment. Full range of models for gasoline or electric power, priced to suit every buyer.

GASOLINE-POWER or ELECTRIC MODELS

See your nearest Westinghouse dealer or write direct to your nearest Westinghouse branch for prices and information.

YOUR LITTLE SAVINGS... FINANCE MORTGAGE LOANS

TENS of thousands of Canadian farms and homes benefit from first mortgage loans made possible by the accumulated savings of Life Insurance policyholders.

For every borrower, there are six-thirty people who supply the necessary funds.

This fact affords a striking illustration of the "double duty" performed by Life Insurance dollars. Not only do they ensure financial security for the men, women and children of Canada, but they also help to build and finance their farms and homes.

Life Insurance companies exercise the greatest care in the selection of properties upon which mortgage loans are made. To safeguard the savings of policyholders, security of principal and interest is and must always be the first consideration.

ALL OUR ADVERTISERS SAY SO

Over \$40,000,000 worth of Western Farm Products poured into the East last year

In steady work, the industrial employee maintains a high standard of living. His appetite for Prairie Province foodstuffs is insatiable. He and his family are one of the reasons why over \$40,000,000 worth of Western farm products found a market in the East last year.

Over \$40,000,000 is a lot of money: it's a sum that means much to the Western producer, collectively and individually. It went, generously, to every type of farmer.

For instance, those specialising in live stock, took in over \$15,000,000 for

127,000 tons of fresh and cured dressed meat, 175,705 head of cattle, 21,144 calves and 41,557 hogs shipped to the East. Nearly 10,000 tons of butter brought in \$4,500,000 more, while grains, poultry, eggs, honey and other commodities accounted for an additional aggregate of well over \$20,000,000.

That is why a prosperous industrial East means a prosperous agricultural West; for more and busier Eastern workers mean a greater demand on their Western commodity. Your purchase of a Made-in-Canada car helps towards this end.

There are 12,000 workers in Canada's automobile plants, and 15,000 employed in the 247 parts manufacturing plants. An average of three in a family owns over 1000 car. People whose property depends in whole or in part on the activities of the motor car business. Add to this, the equipment of railways who live by traffic and you have a large concentration of Eastern Canada — a group of people who constituted much of the \$40,000,000 spent last year for Western farm products.

For statistical and further information about this industry, write to Automotive Industries, 1060 Laurier Building, Toronto.

Britain Loves Peace

Statements Doing Everything They Can To Avert War

It has been impressed upon us several times by authorities that Great Britain today is a sincerely different empire than the one which entered the World War. Britain, today, is determined to keep peace at practically any cost, even at the cost of losing face among the family of nations, which she did during the Italian invasion of Ethiopia. The British hate the very word of "war," and shun to use every diplomatic trick to avert a conflict. Britain always did like peace, but she never allowed another power to bluff its way into a position threatening the supremacy of England on the seas. But the Great War changed things. London is now quite sure that the rest of the empire will not follow the home country into any war which might come along, and that it people have given notice that it would have to be a pretty serious affair before they consented to fight on foreign soil. A greater way to being bluff, but Britain must remain supreme on the seas if the empire is to be kept intact. The navy is England's life line. The main fact is Britain's fighting courage and determination for peace and stability to world problems, rather than turning to war-like measures at any provocation. To-day, Great Britain is faced with double trouble—in the Mediterranean and in the Far East. In the inland sea, she is making a solid stand for safe neutral shipping, and has succeeded in making rather peaceful negotiations with Italy, the power threatening British supremacy. In the Orient, she has recently been forced to take a vigilant stand in the face of Japan, whose aviators shot the British ambassador. Tokyo merely said, "So sorry," and the British Parliament accepted it. Great Britain has been tried almost to the limit of endurance, but has kept her head well. It is said by some that her empire is decaying, and it perhaps is true that the imperial line is not as strong as once it was. Yet, Britain does not deserve praise for continually seeking the peaceful path in a forest of armaments and bayonets. Imperial peace may be an impossible Utopia, but the efforts of Great Britain, leading with the United States, may produce order out of the chaotic mass in which the world finds itself to-day. —San Francisco Argonaut.

SPICE UP VERSATILE TAILORED PROCK WITH GAY COLLAR—VESTER OR SCARF

By ANN ADAMS

A frock-you'll really "be in" this brand-new, really stylish and it's from a pattern so easy to make, that you won't rest until you've at least two different versions in your wardrobe. Business of "some girl" will be delighted with the versatility of Pattern 4234, for whether you wear it with contrasting coat-vest or cuffs or tucked in a smart skirt at the waist, this Ann Adams model is in perfect taste at all times! Wouldn't you like to have it?

Pattern 4234 is available in misses and women's sizes 14, 16, 18, 20, 22, 24, 26, 28, 30, 32 and 34. Size 16 takes 2½ yards 54 inch fabric and yard 39 inch contrasting fabric. Illustrated step-by-step sewing instructions included. Send twenty cents (20c) in coin or stamps (coin preferred) for this Ann Adams pattern. Write plainly: Size, Name, Address and Style Number, and send order to the Ann Adams Pattern Dept., Winnipeg Newspaper Union, 170 McDermott Ave. E., Winnipeg.

Business And Public Affairs

Lord Tweedsmuir Forecasts Changes For The Future

Development of government-controlled but privately-managed institutions bordering on the public utilities was foreseen on an increasing scale by Lord Tweedsmuir, an address before Montreal Junior board of trade.

"We shall increasingly have what you might call public utility corporations under government control and managed executive by private interests," he said. "In England you have examples of this in the central electricity board, the Port of London authority and the British Broadcasting Corporation. And I feel that that expedient is destined to be increasingly followed in the future. It must be if we are to have a really effective administration."

Speaking to the board of trade members on the relation of business to public affairs, His Excellency said the relation was "closer than ever before." He said public affairs mean a great deal to business men since there is no department of life the government does not enter."

Political knowledge in the past was in the hands of a highly expert but small number of men, he said. The ordinary man knows little of such things. But to-day "there are so many expert departments or groups of men, he is entrusted to small numbers. Government must devote on a large number of experts. Not only royal commissions but on men who do actual executive work, because many matters of national concern are business matters."

Business and public affairs were intricately interwoven and it was no use "pretending we could exclude our own grandfathers from the picture," he said, "by saying we don't bother about public affairs."

A Remarkable Machine

Examination Papers Of Georgia University Graded By Robot

The Robot has just completed rawings grading of 20,000 freshman examinations for Georgia's University system.

It is a mechanical professor perfecting by a national machine company and educational foundations. During ten days, he took the examination papers from all the schools in the state's university system, sorted them in tolo and reassembled them in piles along with the score.

The robot works by electricity, "reading" pencil marks on standard forms of the true-false or selective question variety. During the 10 days, said P. S. Beers, university examiner, this monster machine worked which formerly required the combined two weeks' efforts of some 200 persons throughout the state.

Here is how the cold-blooded grading machine works: The examination paper, on which the student has penciled his "X" mark in either a "yes" or a "no" column, is inserted in the machine. The student's mark is read by a sensor on the paper and record the position of the mark. The blade then registers an electric impulse to a photo meter which adds up, calculates and registers the grade.

Learning Figure Skating

Princess Elizabeth Is Assuming Her Lessons In London

Since the Court returned to London, Princess Elizabeth has resumed her skating lessons at a well-known ice rink, and is likely to be accompanied by Princess Margaret. Princess Elizabeth began her lessons last season and made remarkable progress. So far, she has learnt only the straightforward movements, but she has been promised attempts at figure-skating, and also the waltz on the ice. The King and the Queen have never tried artificial ice skating, but a few years ago, when the weather permitted from ponds and lakes in England, the royal skaters skated both at Virginia Water and at Buckingham Palace.

Valuable Picture

Believed to be 500 years old, a Flemish triptych is priceless as far as its owner, E. P. Callen of Sydney, New South Wales, is concerned. Similar one in the Melbourne National Gallery may be worth £500,000, experts say, but they decline to place a value on Callen's altar picture. He says that it has been in his family since the 17th century, when it was stolen from a church 250 years ago.

Lones Bark But Kupa Hits

Karluska Crest, Buffalo's bark, is in the doghouse again. This time the 4-year-old Dobberman Pinscher is charged with biting and will be kept under observation to see if it does it again. The dog was bark led to mugging her vocal cords, she has been doing all her talking in a tiny squeak since last December.

Treatment Of Cancer No. 2

The wise surgeon does not depend on his art alone in the treatment of cancer. In appropriate cases he employs the auxiliary measures of X-ray and radium. In an ever-increasing number of cancers the treatment is a combination of all these methods. In all cases early treatment is essential to success. Neglected cancer is invariably and inevitably fatal.

Forty-two years ago a German professor in the University of Wurzburg, Bavaria, discovered a new kind of ray of light, while engaged in his experiments. This ray, known as the X, or Roentgen ray, has the power of penetrating most substances, of leaving the shadow of a dense object on a photographic plate, of bringing about chemical reactions and of producing changes in living matter.

The X-rays are generated by passing a current of high potential (electricity) through a vacuum tube (Cathode tube), in which the functions of various parts of the body, such as pictures of bones, of foreign bodies such as bullets or calculi. By means of X-rays the functions of organs such as the heart, lungs, stomach, intestines, etc., may be examined. X-rays are used in the treatment of conditions such as lupus, eczema, cancer and many others.

When X-rays are very powerful. They will pass through cardboard, cloth and wood with ease. They will penetrate a thick plank or a book of several inches. Lead, metal such as iron, copper, lead, silver and gold are less penetrable, the denser the metal the more so. White flesh is very transparent to the rays; bones are rather opaque, and one may see the bones of one's hand if the latter is interposed between the source of the rays and a screen.

Consequently, according to the effects of X-rays are destroyed by them, the effect being similar to that produced by the rays of radium. The dose must be accurately measured. In some cases a large dose is used; in others the total dose is divided over a period of several days. The dose applied is called a "fraction," and is called. Needless to say, skill and experience are quite as necessary in the use of X-rays as in the use of radium. The X-rays are dangerous in unskilled hands; they are quite safe when used by the experienced radiologist.

Next article: Treatment of Cancer No. 3.

Editorial Note: Readers desiring the complete series of Dr. McCullough's cancer articles at no cost may secure same by writing for the Health League of Canada, 365 Bond St., Toronto, Ont.

Look Up Your Ancestors

Professor At Nebraska University Has Figured Out Some News

If you are 40 years old and Dr. J. O. Heister, of the sociology department at Nebraska University, is right, you may have had 18 ancestors who were grownups during the Revolutionary War, 312 who lived when the Mayflower came over, 524,288 who were walking the Earth when the King John signed the Great Charter, and more than eight million (without allowing too much for duplicates) who were born in the reign of William the Conqueror. Isn't genealogy grand! — Detroit Free Press.

Something New In Baseball

Just before the season pulled "play ball" in the play-off between the Christian and Baptist teams of the church league in Hutchinson, Kan., the Rev. C. J. Miller stepped to home plate and offered a prayer that there be no hitting between players and umpires. The Rev. J. J. Pre Vol. of the Baptist church offered an amen. The game was played amicably and the Christians won 5-4.

A list of awards to movie personages since 1921 shows Walt Disney the most frequently remembered. It was Mr. Disney, you recall, who invented a better mouse.

Jerry Ambler, Calgary cowboy, won the break saddle riding contest on "Tex Rider" at the 12th annual world championship rodeo at the Edmonton Garden, New York.

Soviet Russia announced its first direct election of a national legislative body to be held Dec. 12 when a new supreme Soviet will be named.

Commander R. D. A. Grey, London, 45, wartime flyer killed at Harrold, Grey, fell to his death from a ninth floor window when fixing a radio aerial.

General Richard Mith, secretary of state in the German air ministry, declared France's military aviation ranks among the finest in the world, after witnessing French aerial units in action at Rheims.

It is understood one battalion will be added to each of the three regiments of the territorial army in Northern Ireland—the Irish Fusiliers, the Irish Fusiliers and the Ulster Rifles.

Canada will have a pavilion at the 1928 Scottish Empire Exhibition at Glasgow with a ground floor area of 24,000 square feet. Major James G. Parnesse, deputy minister of trade and commerce, said after returning from Europe.

Ramsey MacDonald, head in London after a long holiday in Scotland, recently observed his 71st birthday. Physicians have conceded the former prime minister against returning work too early after his long period of poor health.

The Greatest Danger

Good Straight Road Seems To Be Temptation To Drivers

When you examine 700 highway accidents and find that 265 of them occurred on straight-away stretches and only 124 at admittedly dangerous curves, you do not have to go far to find the only possible explanation, which is excessive speed. Barring a few plain lunatics, the very great majority of drivers take such hazards as bad curves, hill crests, etc., with a certain degree of caution. But the wide-open modern road, properly surfaced, marked and banked, is too much of a temptation for a multitude of people who are in too much of a hurry even to think. That is why the majority of accidents happen where there are "good excuses for them"—Montreal Star.

Bortles Grown On Desert
Tons of raspberries and other fruit have been grown in Kara Kum, the desert east of the Caspian Sea in Russia. This has been reported to Moscow by Soviet scientists who were in charge of the cultivation of the products in soil previously believed to be barren.

Although coyotes choose special places to rest and yelp their weird songs, they never use the same nesting place twice in succession.

There are 6,867 miles of railways within the borders of the state of Oklahoma.

Medical Smoke Test

Soft Coal Smoke In Cities Said To Be Weight Reducer

The soft coal smoke of cities is a weight reducer, an ally of gonorrhea and bronchitis and a cause of rheumatism in the lungs.

This medical report, was published in the American Journal of Public Health in connection with the 66th annual meeting of the American Public Health Association.

The medical smoke test, for the first time, separated the effects of smoke and soot. It was found that smoke, anthracite and coke. Little harm was found in anthracite and coke.

The study was made on rats, mice and rabbits by Lucy Schurer, M.D., of the Allegheny General Hospital. The animals lived in chambers containing smoke in the same proportions breathed by humans, but the concentration was higher and more constant. Compared with other animals living in smoke free chambers, the rats in the anthracite air gained five per cent. more weight.

In coke air the rats gained 14 per cent. In bituminous smoke their weight gain was 22 per cent. Less than the control animals.

This however, did not mean that coke and anthracite are sure to cause more weight. For rabbits showed their weight increase in all three kinds of smoky air. Far the worst for them was soft coal, which cut them down by 91 per cent.

The largest numbers of uncomplicated pneumonia and of cases of bronchitis appear in the animals in soft coal smoke.

Weakly Man's Benefactions

Lord Nuffield Gives Large Sum To Worthing Cause In England

Lord Nuffield has announced a second gift of £200,000 (£1,400,000) to the Radcliffe Infirmary at Oxford. Lord Nuffield previously had given £150,000 to the hospital. The second donation is in the form of an endowment fund, the income from which is designed to raise the standard of the infirmary's service.

Recently it was announced the motor car manufacturer had donated £50,000 to the rebuilding fund of the hospital for sick children in London and £15,000 to the Princess Elizabeth orthopaedic hospital, Exeter.

The philanthropist's benefactions in the last 11 years total some £8,000,000, including a gift of £200,000 to Oxford University for endowment of a post-graduate school of medical research and £200,000 for relief of the distressed areas.

Retriever Was Smart

"The other day a true retriever was a remarkable dog. He was the bloodhound's special gift. A lady lost a much-valued cub in a hay field. A retriever, which she did not know, was summoned to the search. He was made to smell the lady's hand first and then told to seek. After half an hour's diligent search he came to hand with the missing article!"

Returning To Oxford

The Hon. Alastair Buchan, who has been visiting his parents, The Earl and Countess of Bessborough, and the Lady Tweedsmuir for the past few months, sailed in the Duchess of York from Montreal for England. Mr. Buchan will return to Oxford University to resume his studies.

A Ten-Minute Warning

All Londoners Would Have In Event Of Air Attack

The civilian population of London would receive only ten minutes' actual warning of an air attack, in the event of war, before the invading aircraft reached their objective.

Major H. Stuart Blackmore, Chief Medical Officer of the Air Battle Precautions Department, British Home Office, made this statement at the Sanitary Imperative Conference at Brighton. He added that the network of observation posts being constructed all over the country would enable a preliminary warning of something like 20 minutes to be given.

He said that the warning would be specific—it would only be a general warning to an area to get "on its toes." The actual warning of the imminence of attack was bound to be much shorter than that, and it was possible that at the outside it was likely to be ten minutes.

Mother: "Bob, why is Johnny crying?"

Bob: "Because I'm eating my cake."

Mother: "Is his own cake flipped?"

Bob: "Yes, and he cried while I was eating that, too?"

"ON THE PLAYING FIELDS"—OF CANADA

Falling To Monte
St. John's college students in Annapolis, Md., soon may have laudable waiters for breakfast, leisurely confab for lunch, and measured military marches for dinner.

Miss Georgia Smith, college dietitian, decided the boys had been eating too fast. She is arranging to have slow music in the dining hall to slow the pace.

Don't miss the Sunday night
concert at Cliff Hall

Miss Fern Rindahl left last
week-end for Minneapolis to
visit relatives.

Mr and Mrs R Moore left last
Sunday for B C where they will
reside in future.

Mr and Mrs B Coverdale, of
Calgary spent a few days here
this week as guests of Mr and
Mrs W Hill.

About 45 members of the Med-
icine Hat Ladies Auxiliary paid
their annual visit to the local
Auxiliary here last Tuesday
afternoon. The meeting was
held in 100 F hall where a
program was conducted after
which refreshments were served.

FOR RENT:—Two roomed
suite with bath and toilet. Ap-
ply to Redcliff Greenhouse.

WANTED:—Girl for general
housework, part time only, leave
name at Review Office.

\$100,000,000

Dominion of Canada 1937 Refunding Loan

The Bank of Canada is authorized by the Minister of Finance to receive Subscriptions for
this Loan, to be issued as follows:

One and One-Half Year 1% Bonds, due June 1, 1939

Issue price: 99.125% and accrued interest,
Yielding approximately 1.50% to maturity

AND

Seven Year 2½% Bonds, due November 15, 1944

Issue price: 98.50% and accrued interest,
Yielding approximately 2.74% to maturity

AND

Fourteen Year 3½% Bonds, due November 15, 1951

Issue price: 99.00% and accrued interest,
Yielding approximately 3.34% to maturity

The 1% Bonds will be dated December 1, 1937. The 2½% Bonds and the 3½% Bonds will be dated
November 15, 1937. Principal and interest will be payable in lawful money of Canada. Interest will
be payable without charge, semi-annually, at any branch in Canada of any Chartered Bank.

1% Bonds \$1,000
Denomination: 2½% Bonds \$1,000
3½% Bonds, \$100, \$500 and \$1,000

Proceeds of this loan will be used for refunding, in part, the outstanding total of \$122,799,800 on
converted Dominion of Canada 5½% Victory Loan Bonds maturing December 1, 1937. The additional
cash required for this purpose will be provided from the Treasury.

Payment is to be made in full against delivery of interim certificates on or about November 15, 1937,
in the case of the 2½% Bonds and the 3½% Bonds, and on or about December 1, 1937, in the case
of the 1% Bonds.

5½% VICTORY LOAN BONDS DUE DECEMBER 1, 1937 (WITH FINAL CERTIFICATE DETACHED)

will be accepted at par up to the amount required for payment of allotments of the new bonds.
Resultant cash adjustments, where necessary, will be made at the time of delivery.

Subscriptions may be made to the Head Office of the Bank of Canada, through any branch in
Canada or any Chartered Bank or through any recognized dealer, from whom copies of the Official
Prospectus containing complete details of the loan may be obtained. The Minister of Finance
reserves the right to allot subscriptions in full or in part.

The subscription lists will open November 3, 1937, and will close at or any or all of the maturities,
with or without notice, at the discretion of the Minister of Finance.

OTTAWA, NOVEMBER 2, 1937.
